The Big Kahuna Solar Ready Pergola Kit is designed like our standard Big Kahuna pergola kits to withstand high winds and elements, but is engineered to accommodate solar panel mounting. Built with 6×6 posts, double 2×10 beams, 2×8 rafters, 2×6 angle braces, bearing boards, post reinforcement boards, and 2×2 top slats. This kit includes all materials required to assemble your solar ready pergola, but does not include solar panels, racks, or other solar related equipment. Like all of our pergola kits, all lumber is pre-cut, pre-drilled and marked for easy assembly.
